PINE • SPRUCE

JAPANESE BLACK PINE

SPANISH SCOTCH PINE

EASTERN WHITE PINE

Each year we produce a variety of native conifer and hardwood seedlings and transplants along with ground covers, landscaping shrubs, perennials and ornamental grasses. We offer the broadest selection of plant material available from one nursery. Musser Forests grown plants are shipped throughout the entire United States.

AMERICAN RED PINE 🌞 *Pinus resinosa* • Zone 2-5 • Also known as Norway Pine. Excellent timber tree. Height to 75 feet with a spread of 15 to 20 feet. Needles are medium to dark green and soft; 4 to 6 inches long. Bark is reddish-brown. Ordinary to poor soil. Can withstand dry, windy, rocky conditions. A fine ornamental tree as a specimen due to its dense, spreading growth habit, with a broad pyramidal head. Good for naturalizing and as a screen or windbreak.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

AUSTRIAN PINE 🌞 *Pinus nigra* • Zone 3-7 • Growth 50 to 60 feet. Spread 20 to 40 feet. Stiff, dark green needles 3 1/2 to 6 1/2 inches long. Dense, pyramidal growth. Ordinary to poor soil. Does equally well in limestone or acidic soil. Can take dry, rocky, windy conditions. Will tolerate seaside conditions and limited amounts of highway salt. Excellent specimen tree for naturalizing. Also good for thick screen or windbreak. Good timber tree.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

JAPANESE BLACK PINE 🌞 *Pinus thunbergii* • Zone 5-8 • Medium growth 20 to 80 feet. Stiff, dark green needles are 2 in a bundle and 3 to 5 inches long. Grows best in moist, fertile, well drained soil. A dense spreading pine with pendulous branches and a broad pyramidal head. The best evergreen for planting along the seashore in the northeastern United States. Withstands seashore conditions. Good for windbreaks, screens, Japanese gardens, bonsai.

EASTERN WHITE PINE 🌞 🌿 *Pinus strobus* • Zone 3-8 • **FAST GROWING** • Fast growing 90 to 100 feet. Spread 25 to 40 feet. A five needled pine, with soft, light green-blue needles, 4 inches long. Can tolerate dry, rocky soil. Grows in normal moisture conditions but can tolerate wet, swampy areas. Excellent ornamental tree for specimen, naturalizing, windbreak or dense screen. Also widely used for Christmas trees and timber.

BLACK HILLS SPRUCE 🌞 *Picea glauca densata* • Zone 2-6 • Slow growth to 40 feet. Spread 15 to 25 feet. One of the most tolerant spruces as it withstands wind, heat, cold, drought and crowding; best in full sun. Short, stiff, bluish-green needles. An excellent, dense evergreen screen that will not get rangy and out of control as it matures. Ordinary soil. Good bonsai subject. Provides dense shelter for wildlife. Make excellent farmstead windbreaks.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

COLORADO BLUE SPRUCE ☀️🌿 *Picea pungens glauca* • Zone 3-7 • Seed from San Juan National Forest. Grows to 100 feet. Stiff, silvery-blue to green needles are 1 inch long. Grown from best seed source for blue color. However, not all seedlings will be blue. Handsome ornamental specimen in single planting or dense, colorful screen or windbreak, space 6 feet apart. Ordinary soil, average moisture.

DWARF ALBERTA SPRUCE ☀️🌿 *Picea glauca albertiana 'conica'* • Zone 2-6 • A dwarf pyramidal evergreen. Densely set light green needles are 1/4 to 1/2 inch long. Very tight, compact growth habit. Slow growing, about 2 to 4 inches per year, to a mature height of 6 to 8 feet. Spread 4 to 5 feet. Good for rock gardens, bonsai, small areas, or planter boxes. A good specimen tree.

			EACH	5 RATE	10 RATE	25 RATE	300 RATE
DASPRPT	GROWN AND SHIPPED IN PLASTIC POTS.	2-4"	\$4.95	\$2.85	\$2.75	\$2.05	\$1.85

NORWAY SPRUCE ☀️🌿 *Picea abies* • Zone 4-7 • **FAST GROWING** • Fast growth to 75 or 80 feet in height. Spread 35 to 40 feet. Dense, dark green needles never get longer than 1 inch. Thrives well in average soil conditions, but prefers moisture in the soil to maintain its deep green color. Highly valued ornamental and timber tree. One of the best conifers for shelters and windbreaks. Branches droop gracefully as tree matures, making this a very attractive ornamental.

SERBIAN SPRUCE ☀️🌿 *Picea omorika* • Zone 4-7 • Medium, symmetrical growth to 50 feet. Stays compact and dense with very little shearing. More narrow than most spruces; mature width about 15 feet. Needles are short and soft; glossy dark green on top, silver underneath. Branches droop gracefully as tree matures. Probably the most beautiful and most adaptable of the spruces.

COLORADO BLUE SPRUCE

DWARF ALBERTA SPRUCE

NORWAY SPRUCE

FIR • REDCEDAR • REDWOOD

WHITE SPRUCE (PAGE 3)

BALSAM FIR ☀️🌿 *Abies balsamea* • Zone 3-5 • A narrow pyramidal growing to a height of 50 to 75 feet; spread 20 to 25 feet. Prefers moist, well drained, acidic soil. Adapts well to cooler climates. Prized for its fragrance as a cut tree. Extensively used for Christmas trees and ornamentals. Needs very little shearing.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE
BAFIRT5	5-Yr. Transplants	2-3	6-8"	\$4.48	\$3.68	\$3.08	\$1.76	\$1.57	\$.95

CANAAN FIR ☀️🌿 *Abies balsamea var. phanerolepis* • Zone 4-7 • Also known as West Virginia Balsam Fir. Native to isolated pockets in the mountains of the Canaan Valley in West Virginia. Relatively dense, pyramidal conifer with a spire-like tip growing to a height of 40 to 55 feet. Spread 20 to 25 feet. Short, soft needles tend to be lustrous, dark green to bluish-green with silvery bands on the underside. Resistant to spring frost injury due to its tendency to break bud late. Strong, uniform, short ascending branches are good attributes for a cut Christmas tree. Highly adaptable to many soil conditions even wet, poorly drained areas. Thrives in cooler climates. Plant in shaded areas or direct sunlight. Suitable as an accent plant, screen or group planting.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

CONCOLOR FIR ☀️🌿 *Abies concolor* • Zone 4-7 • Also known as White Fir. Grows to 100 feet. Concolor Fir is one of the most beautiful and easy to care for evergreens. Ashy gray trunk and soft silvery-blue foliage. One of the best Christmas trees. Holds needles best of any short needled tree. Needs good drainage.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

DOUGLAS FIR

DOUGLAS FIR ☀️🌿 *Pseudotsuga menziesii* • Zone 4-6 • **FAST GROWING** • Seed source Lincoln National Forest, New Mexico. This seed source has proven to be highly resistant to Gypsy Moth. Grows to 60 feet. Short, soft blue-green needles. Grows best in moist, well drained soil. Will not do well in heavy, wet, clay soil. Largest timber producing tree in North America. A popular Christmas tree because of its color, symmetrical form and needle retention.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

FRASER FIR ☀️🌿 *Abies fraseri* • Zone 4-7 • Often called Southern Balsam Fir. Grows 40 to 60 feet in height with a spread of 20 to 25 feet. Very soft, shiny, dark green foliage is silver on the underside. Likes cool, moist, well drained soil. Will not do well in heavy, wet, clay soil. Does not require full sun. Needs only light shearing. The best Christmas tree, with good needle retention.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE
FRFIRT4	4-Yr. Transplants	2-2	3-6"	\$5.12	\$4.32	\$3.72	\$2.13	\$1.90	\$1.15

SILVER FIR ☀️🌿 *Abies alba* • Zone 4-7 • Also known as European Silver Fir. Native to the mountains of southern and central Europe. This lofty ornamental grows to a height of 60 to 80 feet. Spread 35 to 40 feet. Narrow and conical in appearance with horizontal boughs that have upturned tips. Needles are dark shiny green and grooved on the upper surface while the underside has two greenish white bands giving the tree a silvery look when viewed from below. One of the first species used as a Christmas tree. Chosen for its dense, wintry, silver foliage. Plant in sun or partial shade. Prefers moist soil and will grow well in heavy clay soil. The wood is moderately soft and white, used for general construction and paper manufacture. Widely cultivated for its timber. Silver Fir makes a breathtaking specimen and a perfect unique Christmas tree.

EASTERN REDCEDAR ☀️🌿 *Juniperus virginiana* • Zone 3-9 • A dense pyramidal evergreen growing 40 to 50 feet. Spread 8 to 20 feet. Medium green needles are flat and scale-like. Exfoliating handsome grayish to reddish-brown bark is considered part of its ornamental interest. Should grow in almost any soil and does well in poor gravelly soils. Due to its fast, dense growth, this tree is a good choice for an evergreen screen or hedge. No shipments to CA.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

DAWN REDWOOD ☀️🌿 *Metasequoia glyptostroboides* • Zone 4-8 • **VERY FAST GROWING** • Fast growth 70 to 100 feet; spread 25 feet. Also known as the "dinosaur tree", as this species was known over 20 million years ago in China. Soft, bright green needles turn brown in fall. Deciduous. Likes moist, well drained soil, full sun to light shade. Would make a very effective screen, grouping or for use in lining long drives or streets.

EASTERN LARCH ☀️ *Larix laricina* • Zone 2-5 • Also known as American Larch. A slender, deciduous ornamental growing to a height of 40 to 80 feet. Spread 15 to 30 feet. Soft, lacelike needles are pale, bright blue-green throughout spring and summer. The foliage turns bright yellow in fall making this conifer distinguishable from a distance. Plant in full sun. Prefers moist, acidic, well drained soil. Often found in bogs and at higher elevations. Wildlife food. Native to North America. Excellent for groves, screens or as a specimen.

BLUE GIRL HOLLY ☀️ 🌑 *Ilex x meserveae 'Blue Girl'* • Zone 5-7 • Blue Girl Holly reaches a mature height of 8 to 10 feet with a spread of 5 to 8 feet. It has an upright, somewhat pyramidal growth habit. Creamy white flowers are followed by bright red berries, fall into winter. Plant male together or within 20 feet of Blue Girl Holly. Prefers moist, but well drained, acidic soil. One of the best cold hardy female Hollies.

NEW! PAPER WHITE BIRCH ☀️🌑 *Betula papyrifera* • Zone 2-6 • **FAST GROWING** • Often known as Canoe Birch. Grows 50 to 70 feet. Open green foliage turns bright yellow in fall. The bark, which turns snow white, peels off in paper-thin sheets. Grows best in cool, moist localities. Can tolerate wet conditions such as along stream banks and lakes. Most popular birch for ornamental use because of its good foliage, fall color and white bark. It is less susceptible to insects and disease. Bark should turn white in 4 to 6 years. Plant 3 to 5 seedlings together to create a clump.

			5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

RIVER BIRCH ☀️🌑 *Betula nigra* • Zone 3-9 • **FAST GROWING** • Open pyramidal growth to 90 feet. Fall color is yellow. The bark is variable, usually dark gray-brown and scaly, but can be smooth and creamy pinkish-white exfoliating in curly papery sheets. This paper thin bark peels in the winter. An excellent tree for low, swampy areas. Can even tolerate standing water for several weeks at a time. Native to the eastern United States. THIS VARIETY IS IMMUNE TO BIRCH BORER. EXTREMELY HEAT TOLERANT.

CHOKECHERRY ☀️🌑 *Prunus virginiana* • Zone 2-6 • **FAST GROWING** • Can grow 20 to 30 feet in height with a spread of 18 to 25 feet. It is a small suckering tree or large shrub with crooked branches and slender twigs forming an oval rounded crown. Fruit is red, finally dark purple. Good for making jams and jellies. Provides food and shelter for wildlife. No shipments to CA, OR, WA, Canada.

			5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE
CHKE31	1-Yr. Seedlings	6-12"	\$2.70	\$1.90	\$1.30	\$.74	\$.66	\$.40

SARGENT CRABAPPLE ☀️ *Malus sargentii* • Zone 4-7 • A small, shrub-like tree, growing 8 to 10 feet in height, with a wide, mounding top. Spread 8 to 15 feet. Covered with fragrant pure white flowers in mid May. Small, dark red crabapples appear in fall before the leaves drop. The fruit will hang on the tree into winter, if the birds don't get it first. This tree makes an effective screen, due to its dense branching habit and ornamental appearance in spring and fall. Space 10 feet apart for a thick screen. A favorite food for song birds and wildlife. No shipments to CA, CANADA.

AMERICAN COMMON PERSIMMON ☀ *Diospyros virginiana* • Zone 4-9 • A native tree 25 to 40 feet in height and 20 to 35 feet in width. Common Persimmon is slender with an oval-rounded crown, often very symmetrical. The white, fragrant flowers are very sweet and a favorite of honeybees. An edible persimmon ripens with a deep orange color after several frosts. More than one tree is needed for pollination to produce fruit. Persimmon tends to sucker into groves or colonies, producing food for wildlife. The hard, heavy, close-grained wood is used for golf club heads, billiard cues and flooring. No shipments to CA.

DWARF ROSE HEDGE 'SANDY' ☀ *Rosa rugosa 'Sandy'* • Zone 2-8 • Height 6 to 8 feet. Spread to 4 feet. This strain of Rosa Rugosa was developed for salt spray tolerance, beach and sand dune stabilization and tolerance for hot, dry areas with poor soil conditions. This strain is also found to have excellent growth and survival rate, high level of insect and disease resistance and good fruit production. Berries attract birds and the plants provide cover for birds and animals.

AMERICAN SWEETGUM (FALL COLOR)

NEW! AMERICAN SWEETGUM ☀ *Liquidambar styraciflua* • Zone 5-9 • Also known as the Alligator Tree due to the gray, deeply furrowed, scaly ridges of its bark. An aromatic, deciduous tree growing in a very symmetrical pyramidal form to a height of 40 to 75 feet. Branches spread in a horizontal fashion to 30 to 35 feet. A native easily recognized by its star-shaped leaves which are either five or seven pointed, toothed lobes. Squirrels often caught hoarding the prickly seedballs which persist into winter.

HYBRID RHODODENDRON-STANDARD ☀ 🌙 🌑 Zone 4-8 • Mature height 6 to 10 feet depending upon pruning. Spread 5 to 8 feet. Grown from rooted cuttings. All varieties are proven hardy from northern gardens. Leaves are dark, lustrous green all year. Prune off long shoots once yearly, immediately after blooming. Plant in good, well drained soil. Full sun is best for most flowers. Transplants should be lightly mulched first winter with oak leaves, straw or grass cuttings. One year transplants should grow to a spread of 8 to 10 inches in one year. Very hardy. Single stemmed to lightly branched. Rhododendrons RESTRICTED shipment to AZ,CA,HI,ID,MT,NV,OR,PR,UT,WA.

GROUND COVER

CROWNVETCH ☀️🌙 **Coronilla varia Penngift Crowns** • **Zone 4-9** • Grows 12 to 18 inches in height in any climate, sun or partial shade. Coarse, strongly branched stems grow 2 to 6 feet in length. Perennial ground cover. Pinkish-white flowers June until frost. Beautifies problem slopes and banks. Extra hardy; never needs mowing. Chokes out weeds, resists drought, disease and insects. Space staggered on 2 foot centers. Closer spacing will yield coverage sooner. Because of its long root, crownvetch requires about one year to become fully established. No significant top growth should be expected until second year after planting. Grows in any soil, clay, sandy or shale.

PURPLE CONEFLOWER ☀️🌙 **Echinacea purpurea** • **1998 PERENNIAL PLANT ASSOCIATION PLANT OF THE YEAR** • **Zone 3-9** A very robust perennial that is native to the midwestern and southeastern United States. This plant grows to a height of 24 to 36 inches tall with a spread of 12 to 18 inches. The large, daisy-like flowers grow on sturdy stems ranging in height from 3 to 5 feet. The flower petals range in color from purple to lavender. The seed center is a large, orange-copper colored cone that is hard and prickly. Blooms all summer and into autumn. Plant in full sun or partial shade. Prefers well drained fertile soil, but is drought tolerant and adaptable to heat, poor soils and high humidity. Maintenance free. Great for cutting and drying. A butterfly favorite. Goldfinches and other birds love to feast on the seeds in winter. One of the most dependable flowers lending color to a garden, in the height of the summer. Stunning in mass plantings! PHOTO PAGE 15.

DAYLILY • GRASS

APRICOT SPARKLES DAYLILY ☀️🌑 *Hemerocallis 'Apricot Sparkles'* • Zone 3-9 • Clumps of deep green, narrow leaves resembling sturdy grass grows to a height of 12 to 15 inches. Spread 18 to 24 inches. Large, creamy deep apricot flowers are held atop the foliage by 15 inch stems. The petals of the 4 inch blooms sparkle as if covered with diamond dust. The edges of the petals have a fancy puckered appearance. Non stop blooming from June through September. Easy to grow. Plant in sun or partial shade. Prefers ample amounts of water and average, well drained, loamy soil. Long lived seldom needs to be divided. Once established, this perennial is moderately heat and drought tolerant. Rabbit resistant. Attracts butterflies and hummingbirds. Use as a foreground plant and for shrub borders. Definitely makes a bold statement in the garden when planted in mass. Plant Patent #13223.

HAPPY RETURNS DAYLILY ☀️🌑 *Hemerocallis 'Happy Returns'* • Zone 3-9 • This dwarf perennial is a semi-evergreen variety of daylily that is extremely popular and a widely used rebloomer. Deep green, healthy clumps of foliage grow to a height of 1 to 3 feet. Spread 18 to 24 inches. Fragrant, 3 inch, canary yellow blooms sit atop the perky 18 inch stems. Rebloomer from early summer to mid fall. Low maintenance. Drought tolerant and very heat tolerant. Plant in full sun or partial shade. Not real fussy about soil conditions. Rabbit resistant. Will attract butterflies and hummingbirds to your cottage or meadow garden. Use this sun lover for beds and borders, containers, edging and rock gardens. Also makes a great specimen or use as a focal point or in mass plantings. Showy cut flower.

ORNAMENTAL GRASS

These are warm and cool weather grasses. They will be dormant, showing no new growth when shipped. New growth should appear in June.

DWARF FOUNTAIN GRASS ☀️🌑 *Pennisetum alopecuroides 'Hameln'* • Zone 5-9 • This dense, compact mounding grass has gracefully curved foliage that radiates out from a central point. Narrow, rich green, glossy leaves grow only to a height of 24 to 30 inches with comparable spread. Foliage turns golden to orange-yellow in fall, then almond in winter. Fluffy, upright to arching spikelike clusters of softly brushed flower heads are produced in abundance atop a 3 feet tall stem. The flowers are greenish cream or pinkish in early to mid summer, turning tan and lasting into fall. Choose a sunny location. Prefers evenly moist, well drained soil, but will adapt well to various soil conditions. Excellent selection for use in containers, borders, specimen or mass plantings. Designers choice for front yards!

MAIDEN GRASS ☀️🌑 *Miscanthus sinensis 'Gracillimus'* • Zone 5-9 • A rounded clump of arching foliage reaching a height of 4 to 7 feet. Spread 3 to 6 feet. Tiny reddish-copper flowers in September mature to silvery white. Plumes persist well into winter providing good seasonal interest. Plant in full sun or bright shade. Tolerant of a wide range of soils. Use as a specimen, accent, in a grouping, mass or screen. Allow plenty of space for the clumps to grow. A very versatile ornamental grass. Great for dried arrangements.

VARIEGATED MAIDEN GRASS ☀️🌑 *Miscanthus sinensis 'Variegatus' 'Morning Light'* • Zone 4-9 • A gracefully arching, dense perennial grass clump growing to a height of 4 to 6 feet. Spread may reach 6 or more feet across. The slender leaves are fine textured, green with white stripes. Pinkish or silvery 8 to 10 inch long plumes late September through frost. Foliage turns rich gold in October. Favors moist, fertile soil. Drought tolerant. Deer resistant.

DWARF PORCUPINE GRASS ☀️🌑 *Miscanthus sinensis* • Zone 5-9 • A graceful, upright clump of green leaves with horizontal bright golden-yellow stripes. From a distance the bands make this plant have a bright green hue. The stems reach 4 or 5 feet in height with a spread of 2 to 3 feet. In September, silvery pinkish blooms to burgundy plumes appear above the stems. These flower blooms add another foot to the overall height of this grass and are attractive through winter turning to beige, the color of straw. Best planted in full sun but, can handle some filtered shade. Tolerant of any soil, extra moisture appreciated. Deer and rabbit resistant. This compact perennial is suited for the smaller garden or used in a container. Use for cut or dried flower arrangements.
