AMERICAN RED PINE

Pinus resinosa

Zone 2-5

Also known as Norway Pine. Excellent timber tree. Height to 75 feet with a spread of 15 to 20 feet. Needles are medium to dark green and soft; 4 to 6 inches long. Bark is reddish-brown. Ordinary to poor soil. Can withstand dry, windy, rocky conditions. A fine ornamental tree as a specimen due to its dense, spreading growth habit, with a broad pyramidal head. Good for naturalizing and as a screen or windbreak.

AUSTRIAN PINE

Pinus nigra

Zone 3-7

Growth 50 to 60 feet. Spread 20 to 40 feet. Stiff, dark green needles 3 1/2 to 6 1/2 inches long. Dense, pyramidal growth. Ordinary to poor soil. Does equally well in limestone or acidic soil. Can take dry, rocky, windy conditions. Will tolerate seaside conditions and limited amounts of highway salt. Excellent specimen tree for naturalizing. Also good for thick screen or windbreak. Good timber tree.

GROWN AND SHIPPED IN PLASTIC POTS.

BRISTLECONE PINE

Pinus aristata

Zone 4-7

Sometimes called Hickory Pine or Foxtail Pine. This pine rarely grows over 20 feet. This tree is a dwarf, growing very slowly; 1 to 2 inches per year. Its dark bluish-green needles, 5 in a bundle, are usually less than 1 1/2 inches long. Likes ordinary to poor soil, good drainage. A unique specimen in a garden or island planting. Excellent bonsai subject.

JAPANESE BLACK PINE

Pinus thunbergii

Zone 5-8

Medium growth 20 to 80 feet. Stiff, dark green needles are 2 in a bundle and 3 to 5 inches long. Grows best in moist, fertile, well drained soil. A dense spreading pine with pendulous branches and a broad pyramidal head. The best evergreen for planting along the seashore in the northeastern United States. Withstands seashore conditions. Good for windbreaks, screens, Japanese gardens, bonsai.

JBPIN32	2-Yr. Seedlings	2-0 6-12"	\$2.37	\$1.57	\$.97	\$.56	\$.50	\$.30

MUGHO PINE

Pinus mugo pumilio (Most Dwarf Strain)

Zone 3-7

Mugho Pine is also known as Swiss Mountain Pine. Height to 2 feet. Spread to 5 feet. A dwarf prostrate, low growing, spreading pine. Dark green, stiff needles, in pairs, 2 to 3 inches long. Ordinary soil. Can tolerate poor, rocky, dry, windy conditions. This plant is widely used in foundation plantings. Excellent for rock gardens and Japanese gardens. An excellent bonsai subject.

MUPIN12	2-Yr. Seedlings	2-0 2-4"	\$2.37	\$1.57	\$.97	\$.56	\$.50	\$.30
---------	-----------------	----------	--------	--------	--------	--------	--------	--------

PONDEROSA PINE

Pinus ponderosa

Zone 3-6

Also known as Western Yellow Pine or Bull Pine. Height of 80 to 120 feet. Its soft needles are 2 or 3 in a bundle and 5 to 11 inches long. Thrives in poor soil. Shows good salt tolerance. Not recommended for small places. Older trees develop a characteristic plate-like bark. Good for naturalizing, specimens, windbreaks and timber.

SCOTCH PINE

Pinus sylvestris Musser Clone #1 Strain

Zone 4-7

FAST GROWING

Grown from our own clonal seed orchard, started over 45 years ago. This strain has all the desirable characteristics to produce a premium Christmas tree: deep blue-green color year around; good needle retention; disease resistance, reduces spraying; strong budding and good branch angle. Fast, straight symmetrical growth; compact growth habit, requiring minimum shearing.

SPRUCE, FIR

BLACK HILLS SPRUCE

Zone 2-6

Picea glauca densata

Slow growth to 40 feet. Spread 15 to 25 feet. One of the most tolerant spruces as it withstands wind, heat, cold, drought and crowding; best in full sun. Short, stiff, bluish-green needles. An excellent, dense evergreen screen that will not get rangy and out of control as it matures. Ordinary soil. Good bonsai subject. Provides dense shelter for wildlife. Make excellent farmstead windbreaks.

COLORADO BLUE SPRUCE

Zone 3-7

Picea pungens glauca

Seed from San Juan National Forest. Grows to 100 feet. Stiff, silvery-blue to green needles are 1 inch long. Grown from best seed source for blue color. However, not all seedlings will be blue. Handsome ornamental specimen in single planting or dense, colorful screen or windbreak, space 6 feet apart. Ordinary soil, average moisture.

CHRISTMAS TREES - GROWING AND SELLING TREES, WREATHS AND GREENS

This paperback contains 152 pages and 19 chapters of information pertaining to growing and marketing Christmas trees, greens and wreaths. Topics covered in this book include: Site selection, varieties of trees to grow, cultural practices, soil preparation and fertility, tree planting, shearing, weed control, insect and disease related problems and control methods. A great book for the beginner or the seasoned grower.

ITEM NO. TWGBOOK \$12.95

NORWAY SPRUCE

Zone 4-7

Picea abies

FAST GROWING

Fast growth to 75 or 80 feet in height. Spread 35 to 40 feet. Dense, dark green needles never get longer than 1 inch. Thrives well in average soil conditions, but prefers moisture in the soil to maintain its deep green color. Highly valued ornamental and timber tree. One of the best conifers for shelters and windbreaks. Branches droop gracefully as tree matures, making this a very attractive ornamental.

ORIENTAL SPRUCE

Zone 4-7

Picea orientalis

A dense, narrow pyramidal plant that averages 50 to 60 feet in height with a 20 to 30 feet spread. Dark green, stiff, shiny, short needles are 1/4 to 3/8 of an inch long. Cones are 1 inch wide and 2 to 4 inches long; purple at first, maturing to brown. Branches get more pendulous with age. Does best in moist, well drained soil. Excellent for specimen landscape planting.

SERBIAN SPRUCE

Zone 4-7

Picea omorika

Medium, symmetrical growth to 50 feet. Stays compact and dense with very little shearing. More narrow than most spruces; mature width about 15 feet. Needles are short and soft; glossy dark green on top, silver underneath. Branches droop gracefully as tree matures. Probably the most beautiful and most adaptable of the spruces.

EASTERN REDCEDAR

Juniperus virginiana

Zone 3-9

A dense pyramidal evergreen growing 40 to 50 feet. Spread 8 to 20 feet. Medium green needles are flat and scale-like. Exfoliating handsome grayish to reddish-brown bark is considered part of its ornamental interest. Should grow in almost any soil and does well in poor gravelly soils. Due to its fast, dense growth, this tree is a good choice for an evergreen screen or hedge. No shipments to CA.

WINTER RED WINTERBERRY HOLLY

Ilex verticillata 'Winter Red'

Zone 3-9

Height and spread 6 to 8 feet. Winter Red is a female, deciduous cultivar produced by cuttings rather than seed. It is a superior plant in that it is somewhat self pollinizing and will produce a much greater profusion of bright red berries. For optimum berry production, plant with a pollinizer such as Winterberry Holly. Plant Patent No. 29912.E

WINTERBERRY HOLLY

Ilex verticillata

Zone 3-9

Height and spread 6 to 12 feet. Female plants produce bright red berries. Likes acidic soil, will tolerate wet, swampy conditions. As these plants are grown from seed, we cannot distinguish between male and female plants. Therefore, plant at least 5 to ensure pollination.

CHESTNUT OAK

Zone 4-8

Quercus prinus

Height and spread to 60 feet. Can tolerate poor, dry rocky soil. Can grow to 15 feet in 7 to 10 years. Acorns are rich dark brown with a very sweet taste. Relished by squirrels, deer and other wildlife. No shipments to CA, FL, OR.

CHOAK31	1-Yr. Seedlings	6-12"	\$2.70	\$1.90	\$1.30	\$.74	\$.66	\$.40
---------	-----------------	-------	--------	--------	--------	-------	-------	-------

ENGLISH OAK

Zone 4-8

Quercus robur 'Fastigiata'

Narrow, pyramidal growth 50 to 60 feet, but only 10 to 15 feet wide. It is tolerant of salt and air pollution. The distinctively upright and columnar habit makes this a fine specimen tree for the home landscape where there is limited space available. No shipments to CA, FL, OR.

ENOAK52	2-Yr. Seedlings	1-2 ft.	\$3.18	\$2.38	\$1.78	\$1.02	\$.91	\$.55
---------	-----------------	---------	--------	--------	--------	--------	-------	-------

PIN OAK

Zone 4-8

Quercus palustris

FAST GROWING

Native tree with fast growth to 75 feet in good soil. Spread 25 to 40 feet. Acorns are good wildlife food. Makes an excellent specimen as a lawn tree. Will tolerate wet soil but prefers moist rich, acidic, well drained soil. No shipments to CA, FL, OR.

AMERICAN COMMON PERSIMMON

Diospyros virginiana

Zone 4-9

A native tree 25 to 40 feet in height and 20 to 35 feet in width. Common Persimmon is slender with an oval-rounded crown, often very symmetrical. The white, fragrant flowers are very sweet and a favorite of honeybees. An edible persimmon ripens with a deep orange color after several frosts. More than one tree is needed for pollination to produce fruit. Persimmon tends to sucker into groves or colonies, producing food for wildlife. The hard, heavy, close-grained wood is used for golf club heads, billiard cues and flooring. No shipments to CA.

DWARF ROSE HEDGE 'SANDY'

Rosa rugosa 'Sandy'

Zone 2-8

Height 6 to 8 feet. Spread to 4 feet. This strain of Rosa Rugosa was developed for salt spray tolerance, beach and sand dune stabilization and tolerance for hot, dry areas with poor soil conditions. This strain is also found to have excellent growth and survival rate, high level of insect and disease resistance and good fruit production. Berries attract birds and the plants provide cover for birds and animals.

HYBRID RHODODENDRON-STANDARD ☀️🌑

Zone 4-8

Mature height 6 to 10 feet depending upon pruning. Spread 5 to 8 feet. Grown from rooted cuttings. All varieties are proven hardy from northern gardens. Leaves are dark, lustrous green all year. Prune off long shoots once yearly, immediately after blooming. Plant in good, well drained soil. Full sun is best for most flowers. Transplants should be lightly mulched first winter with oak leaves, straw or grass cuttings. One year transplants should grow to a spread of 8 to 10 inches in one year. Very hardy. Single stemmed to lightly branched. Rhododendrons must be fumigated for shipment to AZ, CA, ID, MT, NV, OR, UT, WA. No shipments to HI, PR.

ROSEBAY RHODODENDRON-STANDARD ☀️🌑🌑

Zone 3-7

Rhododendron maximum var. *roseum*

Height 8 to 12 feet and spread 6 to 8 feet. Reddish in bud, turning to pink flowers, late June after other hybrid varieties are finished blooming. Large dark green leaves are evergreen. This is a hybridized, superior form of the wild Rhododendron Maximum. A cross between Roseum Elegans and Maximum, thus giving it better flowers and a much more compact growth habit. Excellent evergreen for use as tall, flowering screen. THIS IS ONE OF THE ONLY RHODODENDRONS THAT WILL BLOOM IN COMPLETE SHADE. However, it can also do well in full or half day sun.

GROUND COVER

CROWNVETCH ☀️🌑

Zone 4-9

Coronilla varia Penngift Crowns

Grows 12 to 18 inches in height in any climate, sun or partial shade. Coarse, strongly branched stems grow 2 to 6 feet in length. Perennial ground cover. Pinkish-white flowers June until frost. Beautifies problem slopes and banks. Extra hardy; never needs mowing. Chokes out weeds, resists drought, disease and insects. Space staggered on 2 foot centers. Closer spacing will yield coverage sooner. Because of its long root, crownvetch requires about one year to become fully established. No significant top growth should be expected until second year after planting. Grows in any soil, clay, sandy or shale.

ENGLISH IVY ☀️🌑🌑

Zone 4-9

Hedera helix

Height 6 to 8 inches when used as a ground cover, can climb to 90 feet as a vine. One of the very best EVERGREEN CLIMBING VINES AND GROUND COVERS. Rich dark green, glossy, three-lobed leaves make dense covering especially on brick or stone walls. Thrives in any good soil and under smoky city conditions. Is evergreen the year around. For walls, fences, etc. Especially desirable beneath shrubbery. Will not climb on very smooth or glazed surface. Space 6 inches apart.

MYRTLE 🌑🌑

Zone 4-8

Vinca minor

Quite often called Periwinkle. Nursery grown ground-hugging plant growing 3 to 6 inches in height. Extra large leaf with perfect, lilac-blue, blue-violet flowers March-April. ONE OF THE BEST GROUND COVERS FOR PARTIAL SUN OR FULL SHADE. Space 6 inches apart. Heavy plants with 10 to 20 runners tied together to form one clump; 50 clumps per bundle of 50. Do not separate clumps; plant as one unit.

GROUND COVER, PERENNIAL, BOXWOOD

PACHYSANDRA TERMINALIS ☀️🌑

Zone 4-8

Spurge

Grows in sun or shade, to a uniform height of 6 to 12 inches. Excellent in masses under heavy shade of trees. A dense, lustrous evergreen, trailing vine-type of ground cover. White flowers, March to early April. If planted 6 inches apart, it will give a pleasing effect immediately and in two years time form a solid ground cover. Any soil. Water liberally. It is VERY HARDY. Fine for terraces or any place where grass is not successful.

PURPLE CONEFLOWER ☀️🌑

Zone 3-9

Echinacea purpurea

1998 PERENNIAL PLANT ASSOCIATION PLANT OF THE YEAR

A very robust perennial that is native to the midwestern and southeastern United States. This plant grows to a height of 24 to 36 inches tall with a spread of 12 to 18 inches. The large, daisy-like flowers grow on sturdy stems ranging in height from 3 to 5 feet. The flower petals range in color from purple to lavender. The seed center is a large, orange-copper colored cone that is hard and prickly. Blooms all summer and into autumn. Plant in full sun or partial shade. Prefers well drained fertile soil, but is drought tolerant and adaptable to heat, poor soils and high humidity. Maintenance free. Great for cutting and drying. A butterfly favorite. Goldfinches and other birds love to feast on the seeds in winter. One of the most dependable flowers lending color to a garden, in the height of the summer. Stunning in mass plantings!

RED MAGIC DAYLILY ☀️🌑

Zone 3-8

Hemerocallis 'Red Magic'

A low maintenance perennial growing to a height of 24 to 36 inches. Spread 18 to 20 inches. This variety is one of the most outstanding classic red Daylilies. Single, medium red blooms have a darker halo with a greenish-yellow throat. An early to mid season bloomer. Plant in full or half day sun. Prefers well drained soil. To promote reblooming and encourage new foliage, remove unsightly leaves and scapes after blooming or cut to the ground. Attracts butterflies and hummingbirds.

WILD SENNA ☀️

Zone 4-9

Senna hebecarpa

A sturdy, upright growing, unbranched perennial plant with very attractive foliage. This bushy mound grows to a height of 4 to 6 feet. Spread 2 to 3 feet. Native to eastern North America. The dark green, compound foliage has an exotic look and gives a feathery appearance when viewed from a distance. Golden-yellow flower spikes appear in July and August lasting approximately one month. In autumn the golden tones are repeated as the foliage turns color. Drought resistant. Plant in full sun. Prefers rich, loamy soil. Attracts butterflies, songbirds and bumblebees. Provides shelter for birds and offers up a nutritious meal of the large chocolate colored seeds. Use as a cut flower. A unique specimen or background plant. A striking appearance in flower gardens because of the showy flowers.

LIQUID FENCE DEER AND RABBIT REPELLENT

Liquid Fence was invented by Clark Kaskie in the Pocono Mountains in Pennsylvania. His need to protect his own plants led to the development of this biodegradable, environmentally friendly, easy to use product. To ensure good adhesion, apply spray to plants when dry. Simply spray on and around plants you want to protect. Spray until a wet look is achieved. Deer and rabbits are repelled by the odor of Liquid Fence (a formulation of egg and garlic) rather than the taste, as most products offered on the market. Animals find the smell offensive and without even a nibble, will avoid plant and garden areas. Proven effective 12 months out of the year, especially in winter when food becomes scarce and outdoor shrubbery becomes inviting. A once a month application will keep plants safe from the critters. Long lasting, rain resistant.

ITEM NO. LIFER1Q

32 oz. Ready to use sprayer-concentrate is already mixed with water, ready to use. **\$13.99**

ITEM NO. LIFEC1Q

32 oz. Concentrate-mixes with water to make 4 gallons of spray. **37.99**

128 oz. Ready to use with sprayer assembly-concentrate is already mixed with water, ready to use. Adjustable nozzle: from fine spray to jet stream. **25.99**

ANIMAL REPELLENT

A natural animal repellent made from hot cayenne peppers that is a safe and effective liquid spray for use on fruits, vegetables and ornamentals. The secret, patented formula stops animals like tree squirrels and rabbits from turning your garden and shrubs into their salad bar. The repellent contains no chemicals or poisons and it is biodegradable, it won't harm the animals or your soil. The Hot Pepper Wax's patented formula stays put. Rain won't wash it off, so you don't have to re-apply after every rainfall.

ITEM NO. HPAWRTU 22 oz. Ready to Use Sprayer..... **\$ 9.95**

Concentrate is already mixed with water, ready to use.

HPAW16Z 16 oz. Concentrate..... **10.95**

MUSSER FORESTS TWO YEAR FERTILIZER TABLETS

This unique fertilizing tablet is designed to root feed evergreen and hardwood seedlings and trees, shrubs, roses, fruit, flower and shade trees, for up to two years. It is easy to use, completely non-burning and promotes vigorous growth. The tablet is simply dropped into the hole at the root zone of the plant at planting time. It releases fertilizer slowly for a two year period. These tablets do not dissolve by water, but depend upon the action of soil bacteria to convert their nutrients to a form that can be used by plants. Tablets are 10 grams each, 20% Nitrogen, 10% Phosphoric Acid, 5% Potash.

TABLETS SHOULD NOT TOUCH ROOTS. FERTILIZE AT PLANTING TIME.

Number of Two Year Fertilizer Tablets Per Size Plant

1 Tablet	All Seedlings, Transplants, Rooted Cuttings
2 Tablets	Container Grown Plants, Roses
1 Tablet	For each 1/2 inch trunk diameter, Large Trees and Evergreens
2 Tablets	Heavy Field Grown Plants

FER100	100 for	15.95			

MUSSER WATER GEL

Musser Water Gel is designed to increase the moisture retention of plants and soil. It is a crosslinked polyacrylamide (non-toxic). It comes in the form of small, dry flakes, which when mixed with water, absorb and retain 200 times their weight in water, as swollen gel particles. Acting like hundreds of tiny sponges, Musser Water Gel has the ability to absorb, release and re-absorb water again and again for several months.

The dry gel should be mixed with water to create a thick slurry. Plant roots should be dipped in and out of the mix immediately prior to planting or carried to the planting site in a bucket of the mix. Musser Water Gel will retain the moisture around the roots at planting time and for several months, it will continue to attract and retain moisture at the root zone every time it rains or plants are artificially watered. Dry water gel is also used to coat seeds prior to planting.

As adequate moisture is the most important key factor to plant survival, we strongly recommend this product.

Benefits:

1. Fewer losses in new plantings.
2. Faster growth rate.
3. Better moisture retention.
