COVER PHOTO:
RED OAK IN FALL

Growth rate of plants stated in descriptions are based on optimum growing conditions without shearing. We cannot guarantee growth rate or survival rate. Most plants can be sheared to maintain a smaller size. As plant sizes are dependent upon summer and early fall weather, sizes listed in catalog are approximated at the time of printing. No adjustments will be made based on size discrepancies.

TREE SPACING

TIMBER PRODUCTION

Tree spacing will depend on your objectives and site conditions. There is no "ideal" layout, if your objective is timber production, spacing trees with 50 to 100 square feet per tree is reasonable, i.e. an 8 ft. x 10 ft. spacing is 80 square feet per tree; a 10 ft. x 10 ft. spacing is 100 square feet per tree. This would calculate to 850 to 450 trees per acre.

EVERGREEN SEEDLINGS AND TRANSPLANTS

Number of Trees Required per Acre for Different Spacing:

3x3	4,840	5x5	1,742
4x4	2,722	6x6	1,210

For Christmas tree planting, we recommend 1,200 per acre at 6x6 ft. spacing.

WHAT DO THE FIGURES 3-0 OR 2-2 MEAN?

3-0 Seedling

2-2 Transplant

Plastic Pot

THE FIGURES 3-0, 2-1, 2-2 indicate the number of years the trees have been in the seed beds and the transplant beds. The sum of all figures is the total age of the tree. Transplants have a heavier stem, heavier root system and are more branched than seedlings. Plants in plastic pots are 3 to 4 years of age.

BARE ROOT PLANTS

Spring Shipping: Starts approximately March 15-May 15.
Fall Shipping: Starts approximately September 15-November 15.

POTTED PLANTS

Shipped year around.

PINE SPECIES RESTRICTED TO: AL, CA, HI, MT, NV, OR.

THE FOLLOWING STATES PROHIBIT SHIPMENT OF POTTED PLANTS: AL, AK, AZ, AR, CA, CO, HI, ID, KS, MI, MS, MT, NE, NV, NM, ND, OK, OR, PR, SD, TX, UT, WA.

AGRICULTURAL REGULATIONS PROHIBIT SHIPMENT OF PLANTS CONTAINING SOIL TO THE FOLLOWING: HI and Puerto Rico. ALL STOCK SHIPPED TO THESE DESTINATIONS MUST BE BARE ROOT.

AGRICULTURAL REGULATIONS PROHIBIT SHIPMENT OF ASH TO THE FOLLOWING: AL, AK, AZ, AR, CA, CO, CT, DE, FL, GA, HI, ID, KS, LA, ME, MA, MN, MS, MT, NE, NV, NH, NM, NC, ND, OK, OR, PR, RI, SC, SD, TN, TX, UT, VT, WA, WY.

Agricultural regulations in specific states prohibit the shipment of the following items: AZ: Butternut, Hickory, Pecan, Walnut; AR: Walnut; CA: Apple, Butternut, Cherry, Chestnut, Chokecherry, Crabapple, Hickory, Hollyhock, Juniper, Oak, Pecan, Persimmon, Plum, Redcedar, Walnut; CO: Flowering Cherry (Mahaleb, Montmorency, Sweet, Wild Black), Plum; FL: Chestnut, Dogwood, Oak; KS: Walnut; MD: Euonymus; MA: Barberry, Black Locust, Euonymus; ME: Black Locust, Hemlock; MI: Cherry, Chestnut, Hemlock, Walnut; MN: Barberry, Black Locust, Walnut; MO: Walnut; NE: Barberry, Walnut; NH: Barberry, Euonymus, Hemlock; NM: Butternut, Hickory, Pecan, Walnut; NY: Barberry; NC: Walnut; ND: Barberry; OH: Barberry, Hemlock; OK: Walnut; OR: Blueberry, Flowering Cherry (Mahaleb, Montmorency, Purpleleaf Sand, Wild Black), Chestnut, Chokecherry, Hazelnut, Hollyhock, Oak, Plum; TN: Boxwood; TX: Butternut, Hickory, Pecan, Walnut; VA: Walnut; VT: Barberry, Euonymus, Hemlock; WA: Barberry, Blueberry, Cherry, Chestnut, Chokecherry, Hazelnut, Hollyhock, Plum. Conifers to WI require a phytocertificate of inspection for Hemlock Scale. Please note: All regulated items listed above may not be available in our current catalog. Agricultural regulations are subject to change without prior written notice. All orders subject to change according to current regulations.

NORWAY SPRUCE TRANSPLANTS

NORWAY SPRUCE
REGULAR SEEDLING, LEFT
PRECISION SOWN, RIGHT

PRECISION SOWN SEEDLINGS

We are offering 2 and 3 year seedlings sown with our Summit Seeder. This machine is calibrated to sow seed perfectly spaced in the row. The result is better rooted, better branched and more uniform plants.

WARRANTY

When it comes to transplanting trees, you must expect some losses. Our plants are shipped in good condition. If your plants should arrive in poor condition, you need to contact the nursery within three days of receipt of your order. If not notified within the three-day period, the nursery relinquishes all responsibility for the losses.

Good care must be used in handling the plants once received by the customer. Plants should be planted as soon as received to expect good survivability. We cannot be held liable for any losses outside of our control: such as, but not limited to, dry weather, rocky soil, exposure to the elements, lack of proper care and/or delayed shipments.

No claims will be accepted for nursery stock picked up one week after the scheduled pick-up date agreed upon by the customer. Be sure to check your order before leaving the nursery for shortages and missing stock.

Under no circumstances will we be held liable for the success or failure of your planting.

Once the order is rendered to the carrier, our liability ceases.

Instructions for making a claim:

1. Notify us in writing within three (3) days after receipt of nursery stock.
2. Note length of time shipment was in transit.
3. State condition of nursery stock on arrival.
4. State name, age, size and exact quantity of plants lost.
5. Remit one-half (1/2) of the purchase price of trees lost, plus charges for shipping and handling.
6. Please refer to your order number.

Upon receipt of a claim properly validated, the replacement stock will be sent at a proper planting time, shipping and handling charges to be paid by purchaser.

WAIVER OF IMPLIED WARRANTIES

We are not responsible, under any conditions, for the quality, productiveness or merchantability of our nursery stock. This warranty which is given expressly and in lieu of all other warranties expressed or implied of merchantability and fitness constitutes the only warranty made by the seller. Orders are accepted without liability for non-performance if labor shortages, delays in transportation or acts of God prevent us from making delivery.

SHIPPING AND HANDLING CHARGES ARE APPROXIMATE COSTS. YOU WILL BE BILLED FOR ADDITIONAL CHARGES AFTER SHIPMENT IF ACTUAL CHARGES EXCEED THE AMOUNT YOU REMITTED.

PINE

AMERICAN RED PINE

EASTERN WHITE PINE

JAPANESE BLACK PINE

MUGHO PINE

Each year we produce a variety of native conifer and hardwood seedlings and transplants along with landscaping shrubs and perennials. We offer the broadest selection of plant material available from one nursery. Musser Forests grown plants are shipped throughout the entire United States.

AMERICAN RED PINE ☀ *Pinus resinosa* • Zone 2-5 • Also known as Norway Pine. Excellent timber tree. Height to 75 feet with spread of 15 to 20 feet. Needles are medium to dark green and soft; 4 to 6 inches long. Bark is reddish-brown. Ordinary to poor soil. Can withstand dry, windy, rocky conditions. A fine ornamental tree as a specimen due to its dense, spreading growth habit, with a broad pyramidal head. Good for naturalizing and as a screen or windbreak.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
ARPINT5	5-Yr. Transplant	2-3	6-12"	\$6.26	\$5.46	\$4.86	\$2.78	\$2.48	N/A

AUSTRIAN PINE ☀ *Pinus nigra* • Zone 3-7 • Growth 50 to 60 feet. Spread 20 to 40 feet. Stiff, dark green needles 3 1/2 to 6 1/2 inches long. Dense, pyramidal growth. Ordinary to poor soil. Does equally well in limestone or acidic soil. Can take dry, rocky, windy conditions. Will tolerate seaside conditions and limited amounts of highway salt. Excellent specimen tree for naturalizing. Also good for thick screen or windbreak. Good timber tree.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
AUPIN43	3-Yr. Seedlings	3-0	10-20"	\$3.34	\$2.54	\$1.94	\$1.11	\$.99	\$.79

EASTERN WHITE PINE ☀ ☾ *Pinus strobus* • Zone 3-8 • **FAST GROWING** • Fast growing 90 to 100 feet. Spread 25 to 40 feet. A five needled pine, with soft, light green-blue needles, 4 inches long. Can tolerate dry, rocky soil. Grows in normal moisture conditions but can tolerate wet, swampy areas. Excellent ornamental tree for specimen, naturalizing, windbreak or dense screen. Also widely used for Christmas trees and timber.

JAPANESE BLACK PINE ☀ *Pinus thunbergii* • Zone 5-8 • Medium growth 20 to 80 feet. Stiff, dark green needles are 2 in a bundle and 3 to 5 inches long. Grows best in moist, fertile, well drained soil. A dense spreading pine with pendulous branches and a broad pyramidal head. The best evergreen for planting along the seashore in the northeastern United States. Withstands seashore conditions. Good for windbreaks, screens, Japanese gardens, bonsai.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
JBPIN33	3-Yr. Seedlings	3-0	10-20"	\$3.34	\$2.54	\$1.94	\$1.11	\$.99	\$.79

MUGHO PINE ☀ *Pinus mugo pumilio (Most Dwarf Strain)* • Zone 3-7 • Mugho Pine is also known as Swiss Mountain Pine. Height to 2 feet. Spread to 5 feet. A dwarf prostrate, low growing, spreading pine. Dark green, stiff needles, in pairs, 2 to 3 inches long. Ordinary soil. Can tolerate poor, rocky, dry, windy conditions. This plant is widely used in foundation plantings. Excellent for rock gardens and Japanese gardens. An excellent bonsai subject.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE

PITCH-LOBLOLLY PINE ☀ *Pinus rigida x taeda* • Zone 4-7 • **FAST GROWING** • Open, loosely pyramidal growth habit. Growing to a height of 40 to 60 feet. Spread 30 to 50 feet. Dark green needles. This hybrid combines the winter hardiness of Pitch Pine and the rapid growth rate of Loblolly Pine. The extensive, fibrous root system enables this plant to adapt well to extreme soil conditions. Prefers acidic soil. Plant in full sun. Can be used for fast screen, wilderness plantings and in solitary locations where poor soil and droughty conditions exist. Also great for fat wood.

SOUTHWESTERN WHITE PINE 🌞🌲 *Pinus strobiformis* • Zone 5-7 • **FAST GROWING** • Similar to Eastern White Pine, except needles are longer, heavier, more dense and more silvery-blue. A five needled pine. This strain is native to the mountainous regions of S. AZ, SW. NM, W. TX and south into Mexico. It will grow from these areas north to NY state. For Christmas tree use, shear when new growth appears.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE

BIRD'S NEST SPRUCE 🌞🌲 *Picea abies nidiformis* • Zone 3-7 • A very slow growing dwarf spruce. Mature height 3 to 4 feet. Spread 2 to 3 feet. Dense, dark green foliage growing in a flat circular form. The nest-like depression in the center of this plant gives it a very distinctive appearance; hence, the name Bird's Nest Spruce. Plant in full sun or light shade. Will tolerate sandier soils and low temperatures. First-rate choice for a rock garden, accent plant or specimen planting.

				EACH	5 RATE	10 RATE	25 RATE	250 RATE
BNSPRPT	GROWN AND SHIPPED IN PLASTIC POTS.	3-4"		\$8.50	\$5.10	\$4.95	\$4.50	N/A

BLACK HILL'S SPRUCE 🌞🌲 *Picea glauca densata* • Zone 2-6 • Slow growth to 40 feet. Spread 15 to 25 feet. One of the most tolerant spruces as it withstands wind, heat, cold, drought and crowding; best in full sun. Short, stiff, bluish-green needles. An excellent, dense evergreen screen that will not get rangy and out of control as it matures. Ordinary soil. Good bonsai subject. Provides dense shelter for wildlife. Makes excellent farmstead windbreaks.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
BHSPR13	3-Yr. Seedlings	3-0	3-6"	\$3.67	\$2.87	\$2.27	\$1.30	\$1.16	\$.93

COLORADO BLUE SPRUCE 🌞🌲 *Picea pungens glauca* • Zone 3-7 • Seed from San Juan National Forest. Grows to 100 feet. Stiff, silvery-blue to green needles are 1 inch long. Grown from best seed source for blue color. However, not all seedlings will be blue. Handsome ornamental specimen in single planting or dense, colorful screen or windbreak, space 6 feet apart. Ordinary soil, average moisture.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE

DWARF ALBERTA SPRUCE 🌞🌲 *Picea glauca albertiana 'conica'* • Zone 2-6 • A dwarf pyramidal evergreen. Densely set light green needles are 1/4 to 1/2 long. Very tight, compact growth habit. Slow growing, about 2 to 4 inches per year, to a mature height of 6 to 8 feet. Spread 4 to 5 feet. Good for rock gardens, bonsai, small areas or planter boxes. A good specimen tree.

				EACH	5 RATE	10 RATE	25 RATE	250 RATE
DASPRPT	GROWN AND SHIPPED IN PLASTIC POTS.	3-4"		\$7.50	\$5.00	\$4.75	\$4.50	N/A

ENGELMANN SPRUCE 🌞🌲 *Picea engelmannii* • Zone 3-5 • Full, Part, Shade. A slow grower, it takes 12 to 14 years to reach 6 feet. It will grow as high as 150 feet. Stiff, blue-green to silvery blue needles. Because of its densely compact pyramidal habit and the fact that it does not lose its lower branches as an older tree, it is one of the better spruces for ornamental planting. Likes ordinary to poor, rocky soil; average moisture.

				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
ENGSP13	3-Yr. Seedlings	3-0	3-6"	\$3.67	\$2.87	\$2.27	\$1.30	\$1.16	N/A

NORWAY SPRUCE 🌞🌲 *Picea abies* • Zone 4-7 • **FAST GROWING** • Fast growth to 75 or 80 feet in height. Spread 35 to 40 feet. Dense, dark green needles never get longer than 1 inch. Thrives well in average soil conditions, but prefers moisture in the soil to maintain its deep green color. Highly valued ornamental and timber tree. One of the best conifers for shelters and windbreaks. Branches droop gracefully as tree matures, making this a very attractive ornamental.

BIRD'S NEST SPRUCE

COLORADO BLUE SPRUCE

DWARF ALBERTA SPRUCE

NORWAY SPRUCE

SPRUCE • FIR • GARDEN SUPPLY

RED SPRUCE

RED SPRUCE

Picea rubens • Zone 3-5 • Red Spruce grows at a slow to moderate rate to a height of 60 to 80 feet. Spread 20 to 25 feet. It has a narrow, conical shaped crown. The needles are yellow green in color, shiny and tend to curve upward. The wood is soft, light, has narrow rings and has a faint reddish tinge. Red Spruce is suitable for Christmas trees. This conifer prefers moist but well drained, sandy loam. Native to North America. The buds and seeds provide food for grouse, red squirrels, pileated woodpeckers and crossbills. Also known as Yellow Spruce.

COOKS BLUE BALSAM FIR

Abies balsamea 'Cooks Blue' • Zone 3-5 • A North American native fir growing to a height of 50 to 75 feet. Spread 25 to 30 feet. Needles are soft, bluish-green in color with a silver flash on the underside. Plant in sandy, loamy or heavy clay soil. Prefers well drained acidic, moist soil. Proven to be more heat tolerant than other species of Balsam. Grows in sun or partial shade. Great for cooler climates. Commonly used for timber and pulp wood. Valued as a Christmas tree due to its excellent fragrance and good needle retention. Also, suitable bough material. Bluer color.

CANAAN FIR

Abies balsamea var. phanerolepis • Zone 4-7 • Also known as West Virginia Balsam Fir. Native to isolated pockets in the mountains of the Canaan Valley in West Virginia. Relatively dense, pyramidal conifer with a spire-like tip growing to a height of 40 to 55 feet. Spread 20 to 25 feet. Short, soft needles tend to be lustrous, dark green to bluish-green with silvery bands on the underside. Resistant to spring frost injury due to its tendency to break bud late. Strong, uniform, short ascending branches are good attributes for a cut Christmas tree. Highly adaptable to many soil conditions even wet, poorly drained areas. Thrives in cooler climates. Plant in shaded areas or direct sunlight. Suitable as an accent plant, screen or group planting.

SOIL MOIST PLANTS TABS

High performance plant tabs for a wide variety of plants. Each tablet contains ten million spores from five types of specifically selected ectomycorrhizal fungi. These spores are effective in increasing water and nutrient uptake, reduction in plant disease and improvement in soil structure. Each tablet also contains fifty spores from seven types of selected endomycorrhizal fungi, a rooting hormone and organic stimulants to improve plant establishment and survival. Each tablet is combined with low levels of timed release fertilizers that encourage mycorrhizal growth. Compatible with all types of plants and shrubs with the exception of laurels, rhododendrons and azaleas. For additional benefits use in conjunction with Musser Forests Two Year Fertilizer Tablets. Soil Moist Plant Tabs may be used when direct sowing, transplanting, container planting and on existing plants.

APPLICATION RATE		PRODUCT AMOUNT	COST

NEW! TURKISH FIR 🌲 🌱 *Abies bornmuelleriana* • Zone 4-7 • This large, majestic evergreen should grow to a height of 50 to 80 feet. Spread 25 to 30 feet. The flat fragrant needles are short, dark green, soft and waxy with a dark, silvery green underside. The waxy cuticle gives the tree a shiny appearance and prevents it from drying out. Their cones are 4 to 6 inches in length, grow upright and are purplish-brown. Prefers acidic, well drained, rich soils. Tolerates heat and dry conditions. Plant in sun or partial shade. Good choices for forest plantings, screenings and windbreaks. Popular as an ornamental or landscape specimen, as well as a Christmas tree. Its branches are strong and arranged symmetrically, making them good for holding heavy ornaments.

MUSSER WATER GEL

Musser Water Gel is designed to increase the moisture retention of plants and soil. It is a crosslinked polyacrylamide (non-toxic). It comes in the form of small, dry flakes, which when mixed with water, absorb and retain 200 times their weight in water, as swollen gel particles. Acting like hundreds of tiny sponges, Musser Water Gel has the ability to absorb, release and re-absorb water again and again for several months.

The dry gel should be mixed with water to create a thick slurry. Plant roots should be dipped in and out of the mix immediately prior to planting or carried to the planting site in a bucket of the mix. Musser Water Gel will retain the moisture around the roots at planting time and for several months, it will continue to attract and retain moisture at the root zone every time it rains or plants are artificially watered. Dry water gel is also used to coat seeds prior to planting.

As adequate moisture is the most important key factor to plant survival, we strongly recommend this product.

Benefits:

1. Fewer losses in new plantings.
2. Faster growth rate.
3. Better moisture retention.

RED BUCKEYE ☀️🌑 *Aesculus pavia* • Zone 4-8 • Also known as Scarlet Buckeye or Firecracker Plant. A handsome deciduous clump forming shrub or small tree growing 10 to 20 feet in height, with a spread of 12 to 15 feet. Produces abundant hard shiny, orange-brown inedible nuts. This tree gets its name from the whitish scar found on each brown seed, giving it the appearance of a deer's eye, hence the name Buckeye. Does well in all soils but grows best in average, moist, acidic well drained soil in full sun to part shade. Native to North America. A hummingbird and butterfly favorite. Plant where you can watch the flurry of activity. Typically planted for the visual interest and beauty it can bring to your landscape. Use as a specimen, ornamental, screen, hedge or in a rain garden.

YELLOW BUCKEYE ☀️🌑 *Aesculus flava* • Zone 4-8 • Also known as Sweet Buckeye. Medium fast, oval upright growth to a height of 50 to 75 feet. Spread 30 to 50 feet. The showy, yellow flowers are produced on 6 inch long, upright panicles in April or May. The flowers are followed by the showy, inedible fruit. When ripe, each nut turns red brown with a whitish basal scar resembling the eye of a deer to which the name refers. North American native. Deciduous. Prefers acidic, moist, well drained soil. The light weight wood is used for crates, boxes and furniture. Attractive in larger gardens and parks. Also a suitable street specimen and shade tree. In colonial times, Buckeyes were carried as good luck charms.

ATLAS CEDAR ☀️🌑 *Cedrus atlantica* • Zone 5-9 • Atlas Cedar grows in a pyramidal shape to a height of 40 to 60 feet. Spread 30 to 40 feet. Eye-catching silvery blue to bluish-green needles make an outstanding appearance in the landscape. It produces an aromatic oil that is a natural insect deterrent. Barrel-shaped 2 to 3 inches long male cones sit upright on the lower branches and larger purple female cones develop on the upper branches. Prefers a well drained, moist, loamy soil but will tolerate sandy, clay soils. Likes acidic, alkaline soils. Can tolerate moderate drought. Plant in sun or partial shade. The wood is commonly used for chests and furniture drawers. This distinctive evergreen makes a beautiful specimen and requires plenty of space to grow.

CEDAR • CHESTNUT • WILD BLACK CHERRY • BLACK CHOKEBERRY • CHOKECHERRY • CRABAPPLE

WILD BLACK CHERRY

CHOKECHERRY

AMERICAN CHESTNUT (FALL)

CHINESE CHESTNUT

DEODAR CEDAR ☀ *Cedrus deodara* • Zone 7-9 • A fast growing evergreen, growing to 40 feet. Light bluish-green needles, with a silvery cast. Does best in well drained, sandy, somewhat dry location, protected from winter winds. Exposure to cold winters, colder than zero degrees Fahrenheit can cause tops to die back.

ITEM NO.			EACH	5 RATE	10 RATE	25 RATE	250 RATE

WEeping ALASKAN CEDAR ☀ 🌙 *Chamaecyparis nootkatensis 'Pendula'* • Zone 4-7 • This elegant, easy to grow pyramidal evergreen tree generally grows to 50 feet in height with a spread of 20 feet. It grows in a conical shape with drooping or weeping branches of blue green or gray green scale-like, aromatic foliage. It prefers full sun, but will tolerate partial sun. Likes slightly acidic, well drained soil. This pyramidal tree with its straight trunk and its graceful branches make an 'eye catching' addition to the home landscape. May be used as a specimen tree.

AMERICAN CHESTNUT HYBRID ☀ *Castanea dentata x* • Zone 4-8 • **FAST GROWING** • A fast growing hybrid reaching a height of 80 to 100 feet. Best planted in full sun in well drained soil. Although both male and female flowers can be produced on the same tree, they need another American Chestnut for good pollination and nut production. Therefore, you should plant a minimum of two trees. This hybrid should start producing rich, flavorful, edible nuts in about 13 to 15 years. These trees are not guaranteed to be blight resistant nor pure *Castanea dentata*. Seed source Musser Forests, Indiana, Pa. No shipments to CA, FL, OR, WA.

CHINESE CHESTNUT ☀ *Castanea mollissima* • Zone 4-8 • Growth to 20 to 25 feet. Turns yellow to bronze in fall. Grows best in full sun; deep, sandy loam. These dense and round headed ornamental trees bear large, sweet, delicious edible nuts. Although, self fertile, it is best to plant two or more for best pollination and nut production. Should start bearing nuts in 3 to 5 years. Blight resistant. No shipments to CA, FL, MI, OR, WA.

SARGENT CRABAPPLE ☀ *Malus sargentii* • Zone 4-7 • A small, shrub-like tree, growing 8 to 10 feet in height, with a wide, mounding top. Spread 8 to 15 feet. Covered with fragrant pure white flowers in mid May. Small, dark red crabapples appear in fall before the leaves drop. The fruit will hang on the tree into winter, if the birds don't get it first. This tree makes an effective screen, due to its dense branching habit and ornamental appearance in spring and fall. Space 10 feet apart for a thick screen. A favorite food for song birds and wildlife. No shipments to CA, CANADA. Photo Page 11.

CHINKAPIN OAK ☀ *Quercus muehlenbergii* • Zone 5-7 • This oak is sometimes referred to as Yellow Chestnut Oak. Grows to a height of 40 to 70 feet. This oak grows in an open, rounded crown shape with lustrous, dark yellowish, green foliage. Its large leaves are 4 to 6 inches long and 1/3 to 1/2 inches wide. The leaves remain a lustrous dark, yellowish green all summer turning to orangish-brown to brown in fall. The mature acorns are about 3/4 inches long and ovoid in shape; brown to black in color. The acorns are a source of food for many birds such as turkeys, pheasants, quail, woodpeckers and blue jays. Many mammals such as bear, squirrel and deer relish these acorns as well. The acorns are edible if roasted. The wood of this oak is hard, strong and durable and may be used for fencing and occasionally for furniture making. Excellent choice for firewood. Prefers mildly acidic to alkaline soil. Makes a nice shade tree in your landscape. No shipments to CA, FL, OR.

AMERICAN COMMON PERSIMMON ☀ *Diospyros virginiana* • Zone 4-9 • A native tree 25 to 40 feet in height and 20 to 35 feet in width. Common Persimmon is slender with an oval-rounded crown, often very symmetrical. The white, fragrant flowers are very sweet and a favorite of honeybees. An edible persimmon ripens with a deep orange color after several frosts. More than one tree is needed for pollination to produce fruit. Persimmon tends to sucker into groves or colonies, producing food for wildlife. The hard, heavy, close-grained wood is used for golf club heads, billiard cues and flooring. No shipments to CA. Photo page 15.

MUSSER FORESTS TWO-YEAR FERTILIZER TABLETS

USE IN CONJUNCTION
WITH SOIL MOIST PLANT TABS!

This unique fertilizing tablet is designed to root feed evergreen and hardwood seedlings and trees, shrubs, roses, fruit, flower and shade trees for up to two years. It is easy to use, completely non-burning and promotes vigorous growth. The tablet is simply dropped into the hole at the root zone of the plant at planting time. It releases fertilizer slowly for a two year period. These tablets do not dissolve by water, but depend upon the action of soil bacteria to convert their nutrients to a form that can be used by plants. Tablets are 10 grams each, 20% Nitrogen, 10% Phosphoric Acid, 5% Potash. TABLETS SHOULD NOT TOUCH ROOTS. FERTILIZE AT PLANTING TIME.

SOIL MOIST ROOT DIP

Soil Moist Root Dip is formulated to inoculate bare root stock prior to planting or shipping. The formulation contains a diverse blend of five species of healthy viable ectomycorrhizal propagules and seven species of endomycorrhizal propagules that are adapted to a wide range of plants and habitat conditions. Five strains of trichoderma are included in the mixture to produce natural growth hormones and enhance disease suppression. Musser Water Gel has been added to the root dip to further increase the moisture retention of plants and soil. The water gel is a non-toxic crosslinked polyacrylamide. The benefits of this product are an important factor to plant survival, establishment and growth. The soil and plant ecosystem is improved. Nutrient and water uptake is increased. Lessens transplanting stress. Three ounces of product will make one gallon of slurry. While agitating one gallon of water in a bucket, slowly add root dip. Continue to mix a few minutes into a slurry or thick gravy consistency. Let product stand 10 to 15 minutes. Immediately before planting, dip roots into mixture making sure roots are entirely coated. Effective on all types of plants and trees with the exception of laurels, rhododendrons and azaleas.

ORNAMENTAL GRASSES

BLUE FESCUE GRASS ☀️ 🌑 🌒 *Festuca glauca 'Elijah Blue'* • Zone 3-9 • This is a clumping, evergreen, cool season grass. Elijah Blue is one of the best cultivars of Blue Fescue with soft, bright blue foliage. Prefers moist, well drained soil. It does not do well in hot, humid areas. Good color accent for rock gardens or borders.

			5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	500 RATE
PBFGRT4	4-Yr. Transplants	4-8" Mound	\$5.45	\$4.65	\$4.05	\$2.31	\$2.06	N/A

BLUE LYME GRASS ☀️ 🌑 🌒 *Leymus arenarius* • Zone 4-9 • Exceptionally beautiful steel-blue foliage. Sharp edged, arching leaves grow to a height of 2 to 3 feet. Spread 2 to 3 feet. Spikes of tan flowers bloom July through August. Spreads quickly through underground rhizomes to form a large patch. Plant in average well drained soil or poor soil where nothing else will grow. Drought and salt spray tolerant. May be used to stabilize steep slopes due to its spreading nature. Decorative when planted in large tubs or pots. Its extraordinary blue color is intensified in mass plantings. Also good for naturalizing.

HARDY EVERGREEN AZALEA ☀️ 🌑 Zone 5-8 • Mature height and spread 3 to 4 feet. One year transplants should grow to a spread of 10 to 12 inches in two years. All varieties for northern gardens. All varieties have proven hardy from zone 5 to zone 8. Plant in good, well drained soil, free of weeds and grass. Full sun is best for most flowers. Prune once yearly, immediately after blooming. Very good for brilliantly colorful low hedges, bank plantings and foundation plantings. Space 3 feet apart.

HYBRID RHODODENDRON-STANDARD ☀️ 🌑 Zone 4-8 • Mature height 6 to 10 feet depending upon pruning. Spread 5 to 8 feet. Grown from rooted cuttings. All varieties are proven hardy for northern gardens. Leaves are dark, lustrous green all year. Prune off long shoots once yearly, immediately after blooming. Plant in good, well drained soil. Full sun is best for most flowers. Transplants should be lightly mulched first winter with oak leaves, straw or grass cuttings. One year transplants should grow to a spread of 8 to 10 inches in one year. Very hardy. Single stemmed to lightly branched.

ROSEBAY RHODODENDRON-STANDARD ☀️ 🌑 🌑 *Rhododendron maximum var. roseum* • Zone 3-7 • Height 8 to 12 feet and spread 6 to 8 feet. Reddish in bud, turning to pink flowers, late June after other hybrid varieties are finished blooming. Large dark green leaves are evergreen. This is a hybridized, superior form of the wild Rhododendron Maximum. A cross between Roseum Elegans and Maximum, thus giving it better flowers and a much more compact growth habit. Excellent evergreen for use as tall, flowering screen. THIS IS ONE OF THE ONLY RHODODENDRONS THAT WILL BLOOM IN COMPLETE SHADE. However, it can also do well in full or half day sun.

IN LOVING MEMORY of our President and Owner, Fred Musser Jr.

Fred passed away June 16, 2026 at age 87. After attending the University of Miami in the early 1960's, he went to work at Musser Forests Inc., under the guidance of his father Fred Musser Sr.

While Fred was a very astute business man, his passion was tree production and could be found out in the field on a tractor doing what he loved the most. He was dedicated to his family, friends, employees and the business. He will be missed by many, especially the staff at Musser Forests, Inc. who will continue on in his memory.

Sincerely, Kevin Musser - Owner

ABELIA • ALTHEA • PERENNIALS

NEW! ABELIA ROSE CREEK ☀️ 🌑 *Abelia x grandiflora 'Rose Creek'* • Zone 2-9 • This compact, low maintenance, semi-evergreen shrub is famous for its long blooming season and tidy mounding habit. Bloom time is late spring through the first frost. It grows 2 to 3 feet tall and 3 to 4 feet wide. Its foliage is glossy green with reddish-purple new growth that turns bronze-purple color in winter. Excellent for attracting butterflies, hummingbirds and other general pollinators. Prefers moist, well drained soil. Deer Resistant!

ALTHEA • MIXED COLORS ☀️ 🌑 *Hibiscus syriacus* • Zone 5-8 • The Althea, also known as Rose of Sharon, is a deciduous shrub growing to a height of 8 to 12 feet with a spread of 4 to 10 feet. It is a decorative shrub that will add a dash of color to your home landscape. This plant blooms in late summer with flowers appearing in late July to early August. The vibrant, tropical-looking blooms, in shades of pink, red and white, remain throughout summer. Butterflies find their blooms very attractive. Prefers rich well drained soil. This plant may be used as a hedge, in a flower bed or as a stand-alone plant specimen.

SPRING ONLY

PURPLE CONEFLOWER ☀️ 🌑 *Echinacea purpurea* • Zone 3-9 • A very robust perennial that is native to the midwestern and southeastern United States. This plant grows to a height of 24 to 36 inches tall with a spread of 12 to 18 inches. The large, daisy-like flowers grow on sturdy stems ranging in height from 3 to 5 feet. The flower petals range in color from purple to lavender. The seed center is a large, orange-copper colored cone that is hard and prickly. Blooms all summer and into autumn. Plant in full sun or partial shade. Prefers well drained fertile soil, but is drought tolerant and adaptable to heat, poor soils and high humidity. Maintenance free. Great for cutting and drying. A butterfly favorite. Goldfinches and other birds love to feast on the seeds in winter. One of the most dependable flowers lending color to a garden, in the height of the summer. Stunning in mass plantings!

RED MAGIC DAYLILY ☀️ 🌑 *Hemerocallis 'Red Magic'* • Zone 3-8 • A low maintenance perennial growing to a height of 24 to 36 inches. Spread 18 to 20 inches. This variety is one of the most outstanding class red Daylilies. Single, medium red blooms have a darker halo with a greenish-yellow throat. An early to mid season bloomer. Plant in full or half day sun. Prefers well drained soil. To promote reblooming and encourage new foliage, remove unsightly leaves and scapes after blooming or cut to the ground. Attracts butterflies and hummingbirds.
